

CYBERSECURITY & INFORMATION TECHNOLOGY

Delivering enterprise cybersecurity and IT solutions supporting NASA and the DoD

- Supports mission-critical federal environments across civil space and defense agencies
- Implements proactive security controls, cyber risk management, and compliance with federal frameworks and policies
- Maintains CMMC Level 2-aligned practices to protect Controlled Unclassified Information (CUI) and strengthen supply chain security
- Delivers end-to-end cybersecurity lifecycle support, including governance, RMF, system authorization, vulnerability management, and continuous monitoring
- Strengthens organizational cybersecurity posture while ensuring compliance with federal standards and requirements
- Integrates cybersecurity into enterprise IT systems and mission operations environments
- Provides systems engineering, software sustainment, and infrastructure management integrated with cybersecurity services
- Brings proven experience supporting NASA mission operations and DoD programs
- Delivers secure, scalable technology solutions that protect mission systems and enable operational success

WHY ROTHE?

- Proven NASA and DoD cybersecurity mission experience
- Deep expertise in RMF, A&A, and cybersecurity compliance
- Enterprise IT and cybersecurity support across federal environments
- Certified cybersecurity professionals (CISSP, CSSLP, GIAC, CCNA)
- Experience supporting classified environments up to TS/SCI
